

Game Jam Submission Document

Game Description

The Fog Below is a tactical survival-horror maze game. The player controls a hunter ghost pursuing a highly advanced, rogue Pac-Man AI. As the match progresses, the maze dynamically shifts, a "glitch zone" shrinks the playable area, and the AI adapts to the player's hunting patterns, eventually evolving to hunt the player back.

Original Game

Inspired by *Pac-Man* (1980). The original arcade classic is a maze-chase game where the player controls Pac-Man, eating dots while avoiding four ghosts with fixed behaviors.

Upgrades / Reimagination

We substantially reimaged the genre by executing a complete role-reversal: the player is the ghost, and the AI is Pac-Man[cite: 1, 2]. We introduced modern Battle Royale elements (a shrinking red zone), tactical abilities (Ping trails, Override Gates, Holographic Decoys), and adaptive machine-learning AI (Pac-Man avoids high-traffic tiles and shifts between evasion and "Hunter Mode"). We also replaced the bright arcade aesthetic with a tense, reactive audio-driven horror experience.

Game Controls

Action	Key / Control	Function
Movement	W, A, S, D or Arrow Keys	Move Ghost
Primary Action	Spacebar	Ping (Reveals Pac-Man's footprint trail)

Action	Key / Control	Function
Secondary Action	Q / Shift	Activate Class Ability / Glitch Energy
Pause / Menu	Esc	Open options menu and pause the game

External Assets Used

- Game logic and HTML/JS structure developed with the assistance of AI (Claude).

Team Details

- Ayush Bangal — Leader / Thought of the game
- Khushi Upadhyay — Rules and Game Design
- ADITYA Raj singh — Testing

Contribution of Each Member

Team Member	Role	Key Contributions
Ayush Bangal	Leader / Lead Developer	Conceptualized the original game idea ("Thought of the game"), built core gameplay loops, implemented physics, and handled system integration.
Khushi Upadhyay	Rules & Game Design / Artist	Established the game rules and mechanics, handled environment design, created character animations, and finalized UI/UX visual polish

Team Member	Role	Key Contributions
ADITYA Raj singh	Lead Tester	Conducted comprehensive gameplay testing, identified bugs/errors, and ensured the final build executed smoothly for submission.
